

TCM update per May 2012

– catching our future

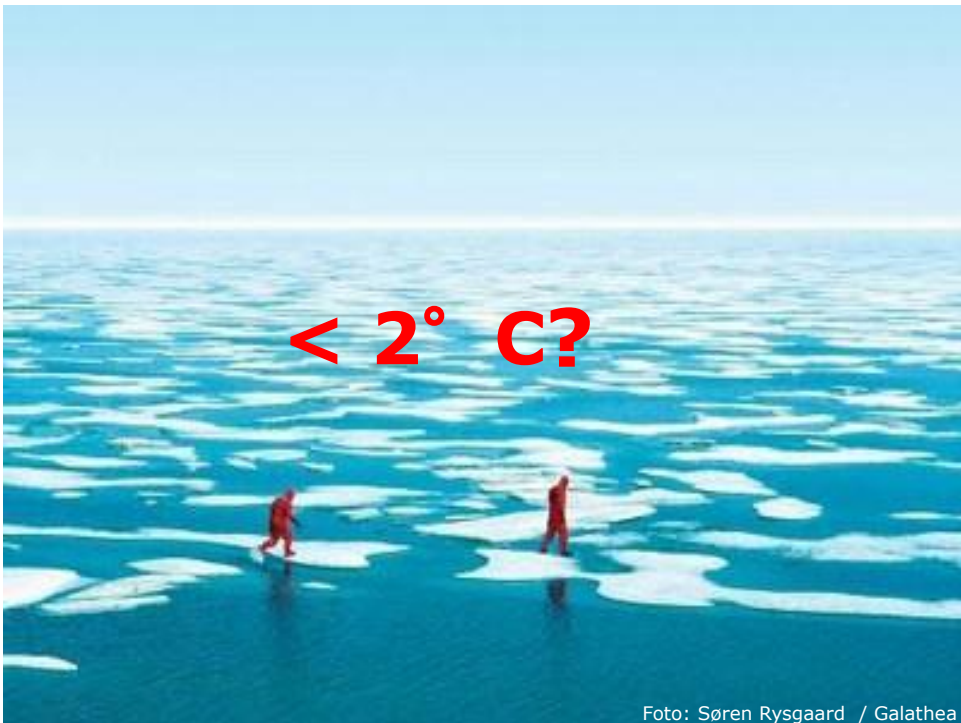

Foto: Søren Rysgaard / Galathea

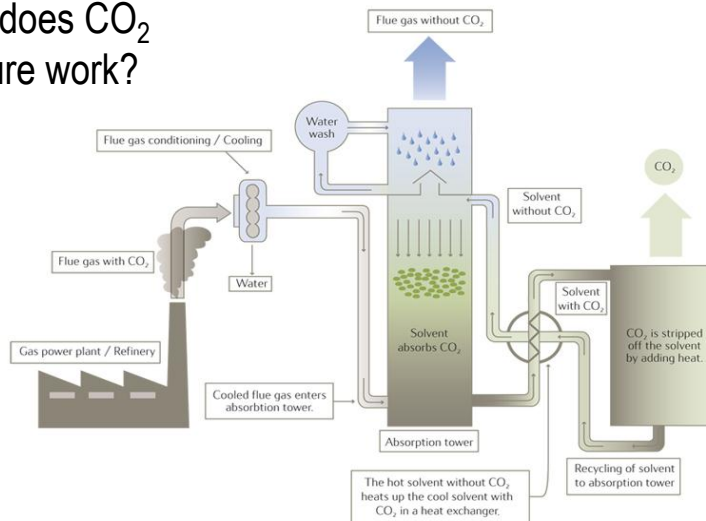

TCM is the world's largest facility for testing and improving CO₂ capture.

Knowledge gained will prepare the ground for CO₂ capture initiatives to combat climate change.

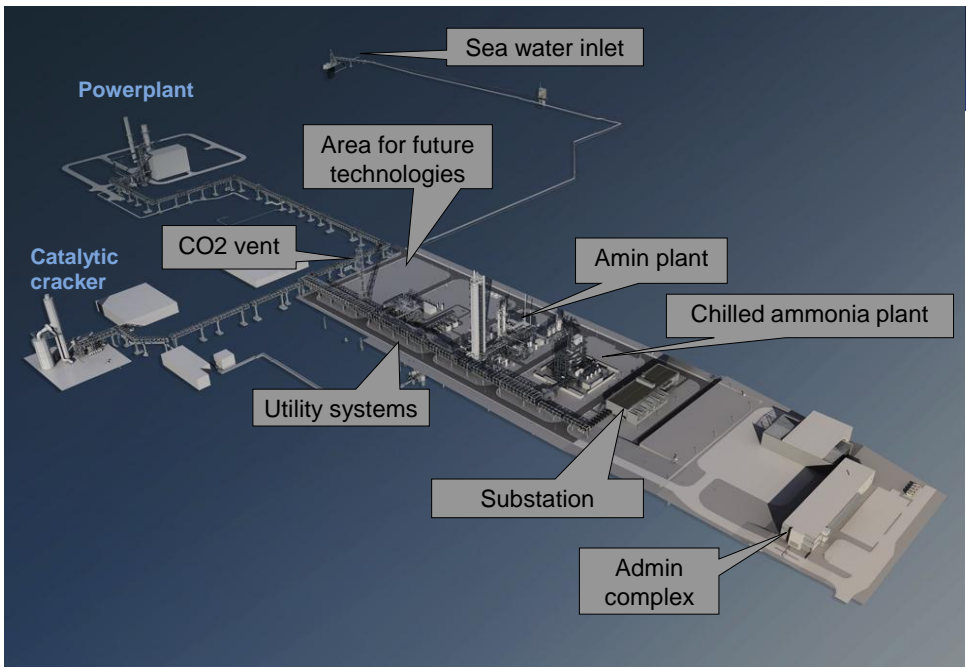

– catching our future

How does CO₂ capture work?

Ambitions:

- Test, verify and demonstrate CO₂ capture technology owned and marketed by vendors
- Reduce cost, technical, environmental and financial risks
- Encourage the development of market for CO₂ capture technology
- Aim at international deployment
